

FOOD SAFETY CULTURE

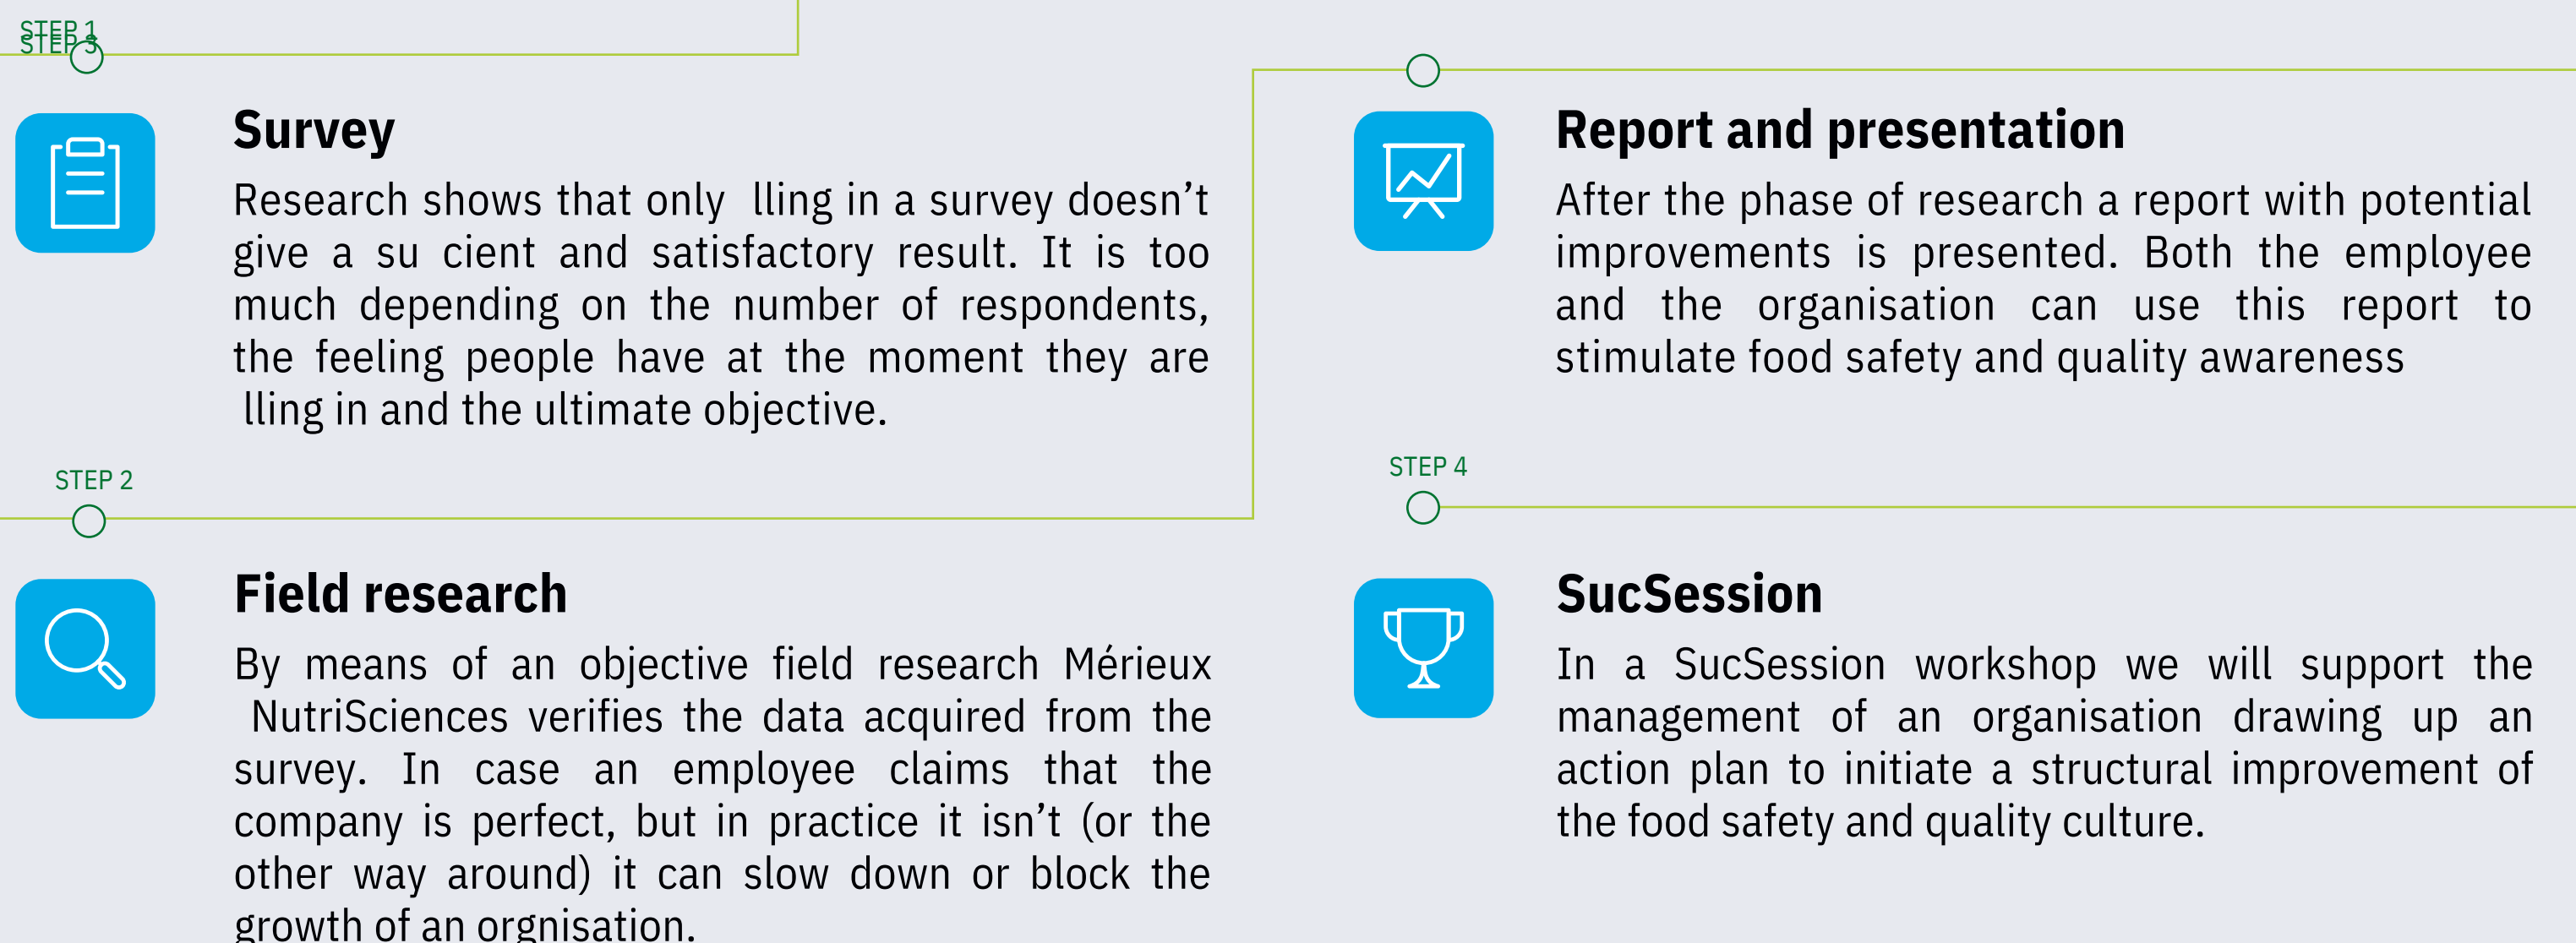

OBJECTIVE

The module Food Safety Culture (FSC) of Mérieux NutriSciences researches the food safety and quality behaviour of the employees within your organisation. Purpose is to create a higher level of awareness of the importance of food safety and quality.

STEP-BY-STEP APPROACH

To create an insight in the current awareness within the organisation we perform research based on a step-by-step approach. This approach ensures a measurement from start to finish and provides a reliable picture of the food safety and quality culture within your organisation.

Our **step-by-step** approach is build up with the following parts:

OUR FSC RESEARCH IS BASED ON THE SUBJECTS BELOW:

-  Involvement
-  Leadership
-  Communication
-  Effort
-  Resources
-  Risk awareness
-  Safety (optional)

In each of these subjects Mérieux NutriSciences has the expertise supporting your organisation in realising the structural improvement.
